

# SPL M

## Large multiple grommets for cables without connectors – double membrane

### FEATURES

- Multiple large grommets for high number of cables (Ø max 16 mm) without connectors
- Grey and black colours available
- UL94-V0 for both colors
- Strain relief according to EN 62444

The SPL M grommets allow many non-terminated cables to be routed through the OSF 50/63 and the DES CLICK Family frames, saving a lot of space compared to the conventional cable glands.

After having slightly perforated the front membrane, the cable is pushed through the hole where the second membrane allows a perfect mechanical and liquid tightness.

**Material:** TPE, halogens and silicones free

**Flammability:** self-extinguishing acc. to UL94-V0 (grey or black)

**Temperature:** -40°C... +110°C (static)
